# Tens and ones – cycle review

Draft • A-MATH-001-04 • M01 • tens/ones component only, 0-99

Use paper, pencil, counters or a blank place-value chart. Directions may be read aloud; you may speak, draw, point to objects or ask an adult to record your words. Take the time you need; there is no speed requirement.

## R1 - Name the unit and build

Use one counter as your one-unit. Build or draw sixty-two in complete tens and extra ones. Label the units and explain how many one-units a ten contains.

Model and explanation:

## R2 - Unpack

Build forty-eight in complete tens and extra ones. Unpack one ten. Show both stages and explain why their amounts are equal.

Before: After:

Reason:

## R3 - Explain zero

Build eighty. Explain what the zero ones means and why the collection is not empty.

Model and reason:

## R4 - Pack at a boundary

Start with nineteen as one ten and nine ones. Add one counter. Show what happens when the ten single ones become another ten. Name the final amount and explain why the exchange keeps the amount after that addition.

Stages and explanation:
