Place-value tasks: three-digit form PV3

- Part of assessment: A-MATH-001-02; form PV3

- Intended learners: 2nd grade; use after the relevant ones/tens/hundreds work

- Status: draft

- Scope: ones/tens/hundreds and values within 999

- Materials: paper, pencil, objects or base-ten blocks, place-value chart; no calculator

Directions may be read aloud. You may use objects, drawings, or spoken answers. Give a reason when asked. For a stated number of counting terms, include the starting number as the first term. Include both endpoints when counting between two numbers.

Tasks

PV3-01

Model 374. Name the unit you are counting and show the amount contributed by each digit.

PV3-02

Model 264. Exchange one hundred for tens, then one ten for single ones. Show the groups after each exchange and explain what amount stays unchanged.

PV3-03

Model 507 and 300. Explain every zero position.

PV3-04

Count by ones from 397 through 401. Show or explain the regrouping when you pass from 399 to 400.

PV3-05

Starting at 45, give five terms while counting by fives. State the step.

PV3-06

Give five terms by tens starting at 280, then five terms by hundreds starting at 200. State each step.

PV3-07

Read 709, express it as a sum of place values, and model the same amount. Explain how the written places match your model.

PV3-08

Write six hundred thirty as a numeral and a sum of place values.

PV3-09

Write, name, and express as a sum of place values the amount formed by three hundreds, eight tens, and no additional ones.

PV3-10

Insert a symbol: 648 __ 684. Explain the comparison using the first differing place.

PV3-11

Insert a symbol: 503 __ 480. Explain the comparison using the relevant units.

PV3-12

Insert a symbol: 720 __ 720. Explain.

The teacher keeps the answer guide separate. This form does not require the optional 1,000 extension. Individual work belongs in private records.
