Place-value tasks: two-digit form PV2

- Part of assessment: A-MATH-001-02; form PV2

- Intended learners: 2nd grade; use after the relevant ones/tens work

- Status: draft

- Scope: ones/tens and values within 99

- Materials: paper, pencil, objects or base-ten blocks, place-value chart; no calculator

Directions may be read aloud. You may use objects, drawings, or spoken answers. Give a reason when asked. For a stated number of counting terms, include the starting number as the first term. Include both endpoints when counting between two numbers.

Tasks

PV2-01

Model 47. Name the unit you are counting and show the amount contributed by each digit.

PV2-02

Model 34 with tens and ones. Exchange one ten for single ones. Show the new groups and explain what amount stays unchanged.

PV2-03

Model 50 and 80. Explain the zero position in each numeral.

PV2-04

Count by ones from 67 through 71. Show or explain what happens to the groups when you pass from 69 to 70.

PV2-05

Starting at 15, give five terms while counting by fives. State the step.

PV2-06

Starting at 23, give five terms while counting by tens. Explain which grouped amount changes and which ones stay the same.

PV2-07

Read 72, express it as a sum of place values, and model the same amount. Explain how the written places match your model.

PV2-08

Write eighty-six as a numeral and a sum of place values.

PV2-09

Write, name, and express as a sum of place values the amount formed by three tens and no additional ones.

PV2-10

Insert a symbol: 64 __ 46. Explain the comparison using the relevant units.

PV2-11

Insert a symbol: 38 __ 42. Explain the comparison using the relevant units.

PV2-12

Insert a symbol: 55 __ 55. Explain.

The teacher keeps the answer guide separate. This form does not check hundreds or the 1,000 extension. Individual work belongs in private records.
